

```
const express = require("express");
const authMiddleware = require("../middlewares/authMiddleware");
const {
  getAllUsersControllers,
  getAllDoctorsControllers,
  getStatusApproveController,
  getStatusRejectController,
  displayAllAppointmentController,
} = require("../controllers/adminController");

const router = express.Router();

router.get("/getallusers", authMiddleware, getAllUsersControllers);
router.get("/getalldoctors", authMiddleware, getAllDoctorsControllers);
router.post("/getapprove", authMiddleware, getStatusApproveController);
router.post("/getreject", authMiddleware, getStatusRejectController);
router.get("/getallappointments", authMiddleware, displayAllAppointmentController);

module.exports = router;
```

The homepage provides an overview of additional healthcare services available on the platform.

Services Include

- Online Consultation
- Laboratory Tests
- Health Checkups
- Medicine Delivery
- Vaccination
- Emergency Care

Purpose

Patients can access multiple healthcare services from a single platform, making the system more comprehensive than just appointment booking.

By combining an intuitive navigation bar, powerful search functionality, specialty-based browsing, featured doctor profiles, health service highlights, patient reviews, and a comprehensive footer, the homepage becomes the central gateway to the entire application. It enables users to quickly find qualified doctors, schedule appointments, and access essential medical services, while ensuring a responsive, secure, and user-friendly experience. This design improves accessibility, enhances patient satisfaction, and supports efficient healthcare management in a modern digital environment

Each doctor card includes:

- Doctor Photo
- Doctor Name
- Medical Specialty
- Rating
- Number of Reviews
- Years of Experience
- Consultation Fee
- View Profile Button
- Book Appointment Button
